

BENEFITS OF UPVC WINDOWS

THERMAL INSULATION AND ENERGY EFFICIENT

Thermal insulation and energy efficient UPVC window and door profile has a low thermal conductive, which can reduce the loss of energy. They are designed with multi-chambers which also reduce the transmission of heat.

WATER TIGHTNESS

UPVC windows and doors profile absorbs water below 0.1% moreover strip in the meeting rail provide water resistance proof.

ELECTRICITY INSULATION

UPVC windows and doors profile has high electricity insulation.

WEATHER RESISTANCE

UPVC windows and doors are exposed in scorching sun, storms, dryness, high humidity or other extreme weather change, they do not rot, corrode nor warp. Even after many years, the windows and doors are still attractive, perfectly tight and working well.

SOUND INSULATION

The multi-chambers, welded corners and tight seals offer excellent sound insulation.

STRENGTH AND SECURITY

All main UPVC profiles are reinforced with steel, providing a high level security.

MAINTENANCE FREE

The closed smooth surface of UPVC profiles ensures ease of clean by using gently household detergent dissolved in water, they are also available with a foil coating in different colors, so you do not need to paint it.

FIRE RESISTANCE

UPVC material used in window and doors are difficult to ignite and do not support or enhance accidental fires unlike their timber counterparts.

ENVIRONMENTAL FRIENDLY

UPVC window and doors can be fully recycled.
